SUMMARY

Passionate and results-driven Computer Science student with a strong foundation in HTML, CSS, JavaScript, React, and Tailwind CSS. Skilled in crafting responsive, interactive, and visually engaging web applications with a focus on clean design and optimal user experience. Adept at translating ideas into functional solutions through problem-solving and creative thinking. Eager to contribute to innovative full-stack projects, collaborate with dynamic teams, and continuously grow as a modern web developer.

EXPERIENCE

Web Development Intern

LettrBlack

September 2025 - Present, Bengaluru

LettrBlack is an EdTech platform for collaborative learning — create study groups, share notes, and learn together anytime.

- Developed Groups feature enabling users to create and join interest-based communities.
- Built News module with dynamic API integration for real-time content updates.
- Created Quiz section with interactive UI, instant results, and gamified experience.
- Collaborated with backend and UI teams for smooth deployment and app optimization.

PROJECT

Starlock - Digital Memory Capsule App

github.com/MeghanaKotambari/Starlock.git

- Built a React-based time capsule app for storing thoughts, media, and playlists.
- Added lock/unlock feature to reveal content only after set time.
- Designed responsive UI with Tailwind & Framer Motion.
- Ensured scalable, modular components for future growth.

ClinicMate - Patient & Doctor Appointment Management System

github.com/MeghanaKotambari/Smart-Medical-Appointment-System.git

- Developed a full-stack healthcare web app enabling patients to register, manage profiles, and book/reschedule appointments with doctors.
- Built doctor dashboards for appointment management, status updates (booked, rescheduled, completed, cancelled), and profile handling.
- Implemented secure JWT-based authentication, protected routes, and linked patient-doctor relational data in MongoDB.
- Designed responsive interfaces with React.js, Tailwind CSS, and managed state using Redux, ensuring seamless real-time updates.

PetConnect - Pet Adoption & Connection Platform

github.com/MeghanaKotambari/PetConnect.git

- Tech Stack: React.js, Node.js, Express.js, MongoDB, TailwindCSS, Framer Motion, Cloudinary, Nodemailer.
- Built a full-stack MERN application enabling users to list, browse, and adopt pets seamlessly.
- Designed a modern responsive UI/UX using TailwindCSS & Framer Motion for smooth animations.
- Integrated Cloudinary for secure image uploads and Nodemailer to send automated adoption request emails directly to pet owners.
- Developed RESTful APIs in Express for pet management, with Axios handling secure frontend-backend communication.

SKILLS

- Web Development: Proficient in HTML, CSS, and JavaScript, with hands-on experience in building responsive, dynamic, and user-focused web applications that deliver seamless user experiences.
- Frontend Framework (React.js): Skilled in React.js for developing component-driven, high-performance interfaces, leveraging React Hooks, Context API, and efficient state management to create smooth and scalable frontends.
- Styling & UI Frameworks: Experienced in Tailwind CSS, designing modern, utility-first, and visually appealing layouts that prioritize usability, accessibility, and performance.
- MERN Stack Development: Proficient in creating end-to-end full-stack applications using MongoDB, Express.js, React.js, and Node.js, with expertise in RESTful API integration and data-driven architecture for scalable web solutions.

EDUCATION

Bachelor of Engineering

Smt. Kamala & Sri Venkappa M. Agadi College of Engineering & Technology. • Laxmeshwar, Gadag • 2027 • 9.0
